Austrian winery is an example of an excellent biodynamic farm. The whole 2000 hectares of farm's land is managed by three brothers, where each of them is responsible for his own direction. Werner is a winegrower. He and his family are responsible for winemaking. Hannes works on a tractor and takes care of harvesting, planting and fertilising. Lucas is growing animals on the farm. Together they created a paradise where animals and plants live according to the laws of nature with minimal human intervention.
